What's New in the January 2006 Update Rollup For Windows XP Media Center Edition 2005?

This update includes the following: ⍰ This update resolves a newly discovered issue in Windows Media Center, where audio playlists saved to a network drive will not work in Windows Media Center when it is restarted. ⍰ This update contains the following bug fix: ⍰ The instruction to play a video stored on a network drive, while playing a video from a local drive, was incorrectly handled when video playback would switch from a local drive to a network drive. Problem: In the current version of Microsoft Windows XP Professional, Enterprise, Home Premium or Ultimate, the Media Center interface hangs when the user resumes from suspend/resume to an external device. Impact: When a Media Center user resumes from suspend/resume to an external device, the Media Center interface hangs and cannot be resumed. Cause: This issue is caused by the following conditions: ⍰ User is logged on as a guest. ⍰ The external device that is used to resume the system from suspend/resume is a USB device. ⍰ The external device has been removed from the Media Center interface. ⍰ The Media Center interface hangs while accessing the external device when it is resumed from suspend/resume. Workaround: To work around the problem, the following steps should be taken: ⍰ Log off the user from Windows XP Professional, Enterprise, Home Premium or Ultimate before the user resumes from suspend/resume to the external device. ⍰ After resuming from suspend/resume to the external device, log on to Windows XP Professional, Enterprise, Home Premium or Ultimate again. What to do if the fix is not applied: ⍰ The update is applied. ⍰ The fix is not applied. Please note: Only issue the update when the computer is in a clean state. Perform the following before installing the update: ⍰ Reboot the computer from a recovery environment. If the update is not applied and the computer is in a clean state, contact your OEM or Microsoft representative for support. If the update is not applied and the computer is not in a clean state, contact Microsoft Technical Support for support. Resolution: This update resolves the problem described in this article.
