And what if they say she's not, because she has had a few diets...and that's making her feel good about herself? chrisg\_04 wrote:She's just a fat girl with a great ass and some big boobs. I don't know how she does it! She really is the best slimmer. of the tissue according to the prescribed geometric prescription for placement of retropositioned tissue. According to another aspect of the present invention there is provided a method for positioning tissue in a body. The method includes steps of introducing a catheter having a tissue attachment means into the body and attaching the tissue attachment means to tissue in the body. A first end of the catheter is positioned in the body in a location adjacent to the tissue. The position of the first end of the catheter is determined by a first fluoroscopic image of the body. The tissue attachment means is progressively distally advanced from the first end of the catheter to a second end of the catheter and the first end of the catheter is positioned in the body in a location different from the location of the second end. The position of the first end of the catheter is determined by a second fluoroscopic image of the body. According to another aspect of the present invention there is provided an apparatus for positioning tissue in a body. The apparatus includes a catheter having a tissue attachment means at a distal end of the catheter. An introducer lumen extends from a proximal end of the catheter to the distal end of the catheter. The introducer lumen receives a guidewire which is movable within the introducer lumen. The guidewire is slidable from a distal end of the introducer lumen to a proximal end of the introducer lumen. A lumen extends through the catheter from a proximal end of the catheter to a distal end of the catheter and is open at both ends. The lumen is configured to move within the catheter a retraction device from the distal end of the catheter to the proximal end of the catheter. The retraction device includes a cannula having a central lumen extending between a proximal end of the cannula and a distal 82138339de
