Best SQL Data Comparison - Learn from experts in 2020 Watch Video Tutorials SQL Compare: What is it and why should we care? In general, SQL Compare is a tool for comparing and synchronizing a pair of SQL Server databases. Its primary purpose is to help database administrators with the following tasks: compare or synchronize databases, any SQL Server database structure such as schemas, databases, indexes, user-defined data types, etc. The purpose of this introductory video is to give some basic information about SQL Compare and show you how it can help you In this video, you can see how SQL Compare works. We will begin with a basic demonstration of using it Afterwards, we will look at some of the main features and we will also see how to synchronize a pair of databases The procedure is as follows: 1. Download the SQL Compare 19.2.0.0 Crack 2. Install the program 3. Run the program We are now going to try to synchronize the databases Now we have both of the databases open in SQL Compare, so let's synchronize them using the "Compare" function Now, if you go to "Compare" you should see the "Synchronize" option You can synchronize a pair of databases or you can synchronize either of them In this case, we will choose "Synchronize" on both of the databases Now, let's synchronize them In this case, we would like to skip one of the databases and we will begin with the comparison of the first database Let's synchronize the databases using the "Skip" option Now, we can choose a range of tables to synchron
