This Kodi is one of the best Kodi you can find. Kodi Free (formerly XBMC) Controls: Fullscreen Resize Screen lock Lock shortcuts Indicators View OSD EPG Transcode Playlist It's not a bug or issue with the application, but with your device. If your device is rooted and you're not using SuperSU, then your device could be missing the su binary, if installed, which is required for remote control of Kodi. Reply New Version of Kodi

What's New in the Kodi (XBMC)?

A music streaming service, with over 30 million tracks in-sync. Over 10 million free songs, and a slick user interface for quick navigation. The iHeartRadio app is designed to make it easier for you to listen to the best of music. From playing to creating stations, it has everything you need to find the music you love. WHAT'S NEW 1. Fix: Stations were not displaying properly on Android versions lower than 10. We also fixed various stability issues for Android 10. 2. Fix: The app has a more stable scrolling experience and loads more data. 3. Fix: A bug that caused the volume of some of your favorite stations to change incorrectly while adjusting the playback volume has been fixed. 4. Fix: We've fixed a few crashes in the app. 5. Fix: You can now switch between playlists directly in the app. 6. Fix: 'Stream Now' feature is now available to all users. Please send us feedback through the app or in the comments below. We will use the data to continue to make the app better. Description: Music Unlimited gives you access to over 30 million tracks in-sync. It's the best music streaming app on Google Play, and it comes with the largest music catalog in the world, which means the best music is always right at your fingertips. Listen to the hottest artists, and explore new genres on the free Music Unlimited mobile app. Even listen to millions of songs without a subscription. With over 10 million free songs and albums, it's the best way to enjoy music on Android! WHAT'S NEW - We've made a change to the app that might help you when downloading music. Now you can download music before you decide to start listening to it. (Note: We do not recommend using this feature if you are unable to immediately start listening to your music because downloading takes a bit of time.) - We've made a change that will improve the stability of the app. - We've fixed a bug that caused the volume of some of your favorite stations to change incorrectly while adjusting the playback volume. Please send us feedback through the app or in the comments below. We will use the data to continue to make the app better. Thank you for using Music Unlimited app and for your great feedback. Free music streaming service for Music Unlimited subscribers. Description: A music streaming service, with over 30 million tracks in-sync. Over 10 million free songs, and a slick user interface for quick navigation. The iHeartRadio app is designed to make it easier for you to listen to the best of music. From playing to creating stations, it has everything you need to find the music you love. WHAT'S NEW 1. Fix: Stations were not displaying properly on Android versions lower

System Requirements:

Click Here to view list of System Requirements. Bugs: Sound: An error is often caused by a bad system sound. Due to the fact that in most of the situations this problem is accompanied with other ones (mostly cosmetic ones), this error is very seldom, and does not demand an action in most of the cases. "Bad Audio" is often the result of this: a player (usually Steam) cannot find the audio files, and/or cannot play the audio correctly. If Steam is the player, open the player's properties, select
