With the session management enabled, all SMS messages, both incoming and outgoing, will be stored in the specified log file (file will be kept until the session is stopped). Furthermore, if desired, the user can be assigned a unique session ID. This way it will be possible to identify specific messages. Such log files will be stored in the specified log folder. The user will then be able to send messages via the assigned session ID. Session IDs can be retrieved with the getSID() method

Auron SMS Server Free License Key
