Heroes For Sale is the debut studio album by American Christian rapper Andy Mineo, released on August 5, 2013, throughÂ .Many types of solid dosage forms of pharmaceutical agents, such as oral solid dosage forms, have been developed. For many of these known solid dosage forms, however, the agent is released from the dosage form or administered as soon as the dosage form reaches the gastrointestinal tract. In addition, different individuals may require

---

different levels of drugs for treatment. The development of delivery systems to improve the release of drugs or drugs and drug delivery methods that can tailor the level of the drug to the required dose has been the subject of much work. Another common delivery challenge that can reduce the effectiveness of a drug therapy is drug degradation during the gastrointestinal transit. This is especially true for oral solid dosage forms containing low stability pharmaceutically active agents. Some approaches to overcome this problem include encapsulation of the agent into a liposome or a polymeric matrix, or using an agent with slower dissolution properties. However, both of these approaches increase the complexity and the costs associated with manufacturing the dosage form.

**Fokker D.VII** The Fokker D.VII was a Dutch-built three-bay biplane torpedo bomber of the 1920s. **Development** The Fokker company and the Dutch Naval Aviation department both started development work on a monoplane torpedo bomber, designated the D.VI. It had two all-moving tail mounted 10 cm (4 in) MKS machine guns. The first D.VI was a single float biplane powered by a pusher engine. It took part

---

in the 14th Naval Air Meeting at Scheveningen on 16 March 1926, in which it obtained a first prize for speed. The D.VI was followed by a development of the same type, designated the D.VII. The D.VII was a high-wing monoplane with a twin pusher engine mounted in the nose, which drove a two-blade propeller. The D.VII first flew in September 1926. It was highly manoeuvrable and fast, with a top speed of around 200 km/h. The D.VI and D.VII were later re-engined
