Advance CAD applications are typically asked to display their exact drawings or a specific detail in a time-consuming way. With the new Markup Import and Markup Assist command, you can import the details of a printed paper or PDF, making only the changes you need in your drawing. You can use the Markup Import and Markup Assist command to send feedback or suggestions to a drawing, without the need to edit the drawing or have someone else do it for you. Markup Import and Markup Assist lets you import the printout with little or no changes required. Arrow Keys: Draw a continuous line with arrow-key commands. You can define your line shape in a variety of ways, including: A previously-drawn line: To draw a line, click where you want the line to start, press the UP or DOWN key to define the line's slope, and click again to start the line.
