Badoo to be removed from Windows Store! Are you affected? Badoo (or Internetkamera) is a popular photo sharing application created by Badoo Ltd. The program was launched in mid-2010 and had been downloaded over 100 million times. Badoo is still a well-known application and recently reached the 10 billion downloads milestone. Badoo was one of the first applications to be accepted for the Windows Store. It was first uploaded to the Windows Store on November, 15th 2014. It was the only application in the Windows Store that was launched in the 1980s (since Windows 3.0), which was quite an amusing addition to the Windows Store. It is the first application that joined the Windows Store in 2012, back in January of 2012. In November of 2014, it was the 7th most-downloaded application in the Windows Store, according to the Microsoft Store. It was the second photo app to be launched in the Windows Store, after Bing Photos. It was named one of the best apps of 2014 by PCMag, as well as the one of the best apps of 2015 by Wired. It was one of the first “chatroulette-like” apps to be launched in the Windows Store. The application is not free to use; however, the free version does not include limited access to the images on one’

----- Block Bad is a lightweight software application designed specifically for helping you block all malicious websites and annoying popups that may steal sensitive information about your browsing sessions. The advantages of being portable This is the portable version of the program and it is important to mention that it doesn't leave any traces in the Windows Registry. You can copy it on any USB flash drive or other devices, and take it with you whenever you need to block websites on the breeze, without having to go through installation steps. Simplistic looks You are welcomed by a clean layout that offers only a few configuration settings to tinker with. Everything is kept as simple and clear, so tweaking the dedicated parameters proves to be nothing but a child's play. Block Bad gives you the possibility to create a custom list with the websites that you want to block, add multiple URLs, as well as remove the selected ones. It is important to mention that utility offers support for an online database that is constantly updated. Additionally, you can contribute with reporting malicious websites by sending the selected URL to the online database. Since it doesn't require much computer knowledge to work with this tool, even less experienced users can master the entire process with minimum effort. During our testing we have noticed that Block Bad accomplishes a task pretty quickly. As it would be expected from such a small utility, it remains light on system resources, so it doesn't hamper computer performance, nor interfere with other programs' functionality. Bottom line To sum things up, Block Bad offers a simple software solution when it comes to helping you block malicious websites on the fly.
