The Global Environment Institute showed a dramatic increase in drought across the globe. The dry conditions are likely to continue this year. An in-depth media team who have been sent to the region to report on the impact of the drought (including some who have been in the field for months already) is on-site at the time of writing and will be posting daily on The Precipitation Gap. We've previously featured updates on the drought in the Goldfields here in Western Australia and from Yuma in the USA. Please watch this space for more information and don't forget to check out the Global Environment Institute's drought map. Case: 14-
