I have a class, that has (lets say) 30 members. I use vector to represent a vector of these members. My class will have a vector of these vectors; e.g. a 4x4 grid of vectors. Is there a boost to using a vector over a plain array to represent this vector? This class will do other things, but they are unrelated to this question. A: No. Vectors use pointer to underlying storage. A plain array uses direct access to the storage. and shakiness), and as such would seem to fulfill the "quick, easy, and dirty" criteria for the heavy metal voter. Just as the primary vocals of Johnny Cash and AC/DC make the listener feel rather than merely hear, the combination of sullen attitude and gritty guitar work renders the music somewhat disorienting, but in a pleasing way. Until next time, this is Jonny Crowe with 100 percent of me speaking from the seat of my own mouth. Until next time, enjoy the music! Songs: "I Wouldn't Want To Be Like You" (Jonny Crowe cover, 1993) "Slow Hands" (Jonny Crowe cover, 1994) "Honey Come Back" (Jonny Crowe cover, 1995) "Bad Shit" (Jonny Crowe cover, 1995) "More Dogs" (Jonny Crowe cover, 1995) "Wildman" (Jonny Crowe cover, 1995) "Hooker" (Jonny Crowe cover, 1997) Special thanks to Mike Apaydin, a true pioneer of heavy metal and music in general and a grandfather of the modern generation of very active and very creative heavy metal fans, who provided a vital financial base for the purchase of
