Firebanned I have time for 1.9 is going to be out soon and i'm sad like always. I am also going to try this mod for 1.8, it will be out the soonest. I can't wait to see some of my friends and or enemies on the server. I'm not going to be on much though because i have school and work and to be honest this game should be played on the internet. Love and Craft. I know, right? Well anyways this mod brings more undead like Ghasts and Slimes with Monster parts like a right arm. I love this mod. The other mods are made by Evelyn, I don't know why she has powers of the void or something like that. Anyway if you like zombies, monster parts, or creepy ghasts this is the mod for you. It is updated frequently and i get updates when they are out. I will be playing it with my friends in a server soon.

Watch out for Spawners because they hit hard, and need to be destroyed after they spawn. Or you can try to pick up their weapons and they'll become "friendly". Beware the Shipyard Not sure if there's anything new other than the new mod that enables you to have a limit on passengers on your ship. And in the early beta's, you couldn't actually get any passengers with the mods

that enabled the Shipyard. That's a shame. It would be nice if you could have a 'max passengers' as well as 'additional passengers' limit. And the Shipyard, just be aware of how it works. The 'extra space' comes from the lower cargo capacity. Don't try to put a sailing ship in the interior of a shipyard. Unless you like getting lost, and are very fast. Have fun! Necromancer Sphere. What's the deal with this? Lol. I'm not a fan of the Sphere, but some people are. If it's meant to be generally useful then it's a shame that it isn't a floating block as in your inventory as you are mining or constructing. In the early days of this mod's development, it was used to make necromancers. Except they weren't necromancers and they were possessed. And the stone monster module was invented by Ezren and then assigned to the necromancers. Right now it's mostly used to make zombie/ghast monsters with full health. You
