Ride the bike and help the rider get to the end of their journey as fast as possible. A rider needs your help if you want to survive on a dangerous road. Here you will not only have to avoid all the obstacles on your way, but also fight the big animals such as wild elephants, flying dragons or robots. The bicycle is your only companion on this journey as well as the only means of transport. It will give you some clues and help you in some situations, but mostly, you have to do everything on your own. How it works: This game is played on a map that is composed of an endless list of levels. A level starts with a starting point and a destination point. You can begin your journey any point at which you want to. You will never enter the same level twice in the same playthrough. So you will have to use your imagination and creativity to get from Point A to Point B. A level will get bigger the more points you achieve. A point is achieved when you jump, hop, flip, etc to get to the other side of an obstacle. There are objects around you that provide additional challenges, like spikes for example. The more objects you defeat, the more points you get. If you want to master this game, you will need to learn how to balance and perform tricks. If you complete one level, you will earn stars, which you will then need to trade at the shop for helpful in game bonuses. Pick Up: Tapping the screen will pick up the bike or the rider. Set: Tapping on the screen will set up the bike. Jump: Touch the screen while airborne for an acrobatic jump. Ride: Touching the screen when riding the bicycle will let you ride it. Flip: Touching the screen while on your back will flip you over and flip the rider off the bike. The same will also add points. Spike: Touching the screen will spike over the object you have jumped over. The object will lose its spike and have to be climbed over again. Hop: Touch the screen at the desired height will enable you to hop over a high object. Spin: Touching the screen while riding forward will enable you to flip the rider and send them rolling down the road. Deal with: Touch the screen when you run into an object. The object will disappear. Avoid: Touch the screen when you

Gunner is about a small craft that can fly around and pick off the enemies on the way up. Every enemy can drop all kinds of obstacles like debris and explosions that will kill you if you hit them with your ship. To survive and reach the end, you'll have to be smart, act fast and think ahead. Think about your next move and make sure you're not hit by any obstacles. *** Note: The game looks a lot different depending on your device and brightness settings, but is the same game. Indigo is a must-have digital retro game for the Gameboy. All the familiar colors and shapes look incredibly sharp, but will they always remain pixel-perfect on the Nintendo eShop? Plus, you're not always alone on the job floor — there's a whole squad of slig cadets to look out for! Play as Abe, the lowest-ranked Cleaner in the Indigo Plant, who's finally been assigned to the Big Wall to scrub out the grit and grime of this colossal factory floor. Look after the slig troops as you move from one department to another, taking on the various cleaning and maintenance tasks handed to you by the factory foreman to complete while following the clock to get everything done in the shortest possible amount of time. Some of the duties you'll have to perform include cleaning the plant cafeteria, keeping track of how much water you use, and unlocking the door to the factory's production line! Sounds easy enough, right? Well, it's not. Along the way you'll encounter a variety of factory hazards that could do terrible damage to your once-clean floor. Some of these are relatively straightforward to deal with, but you could also face hazardous chemical spills, exploding pipes and pressure valves, slippery slime, and a whole host of other unexpected hazards. But if you finish your cleaning before the time runs out, you'll earn a special unlockable costume that's just your style! To perform tasks as quickly as possible, focus on any area where the pressure valve is. You'll be able to access areas near any pressure valve at any time. If you are near the pressure valve, your operations will perform at maximum speed, allowing you to complete your task in less time. This version of the game includes:- A scoring system that displays your current score after every three minutes.- A time-bonus system that gives you bonus time (and points!) for completing various tasks quickly. Time adds up over time so that you can accumulate more bonus time. You can also collect points for collecting time bonuses.- The ability to save your high scores. This feature is only available with the local network feature.- A LAN Play option.- The "Last Played" section in the game's main menu now remembers your last data saved when you switch back to the main menu. - A load-order setting to decide the order in which the icons of your missions, stock, work order,
