Airline Director 2 - Tycoon Game is an challenging simulation game about running a carrier airline, from the early days to the years of the new millennium. Your mission is to make your airline grow in size, fly to the most of airports, maximize your profits and take care of your staff. Whether you are a professional, a fan of flight simulator or just a traveler who likes the new and daring things - everyone is welcome! In this tycoon game, the user is challenged to start his own airline company. The player can choose to operate a low-cost carrier, or can choose to become a premium carrier with world-famous jets and a chic and elegant interior. By

clicking on the map of the territory, the player begins to build connections. Frequent passenger trains as well as boats and boats are available for connecting airports of the same type. In the early years, the aviation industry was quite chaotic. Soon, several airlines were founded, and today there are more than 220 carriers operating the sky. You can create routes and change them whenever you want. Airlines can establish routes between destinations, and the player can choose if he wants to prefer passengers or cargo traffic. In addition, you can link the cities through airports of the same type. You can establish routes between airports with the same category or even of the same name. You can choose to fly by city or by country. One of the key elements of the game is the economic system. Economies vary by country and by region. The game uses the most modern and accurate data from the aviation industry. Although most carriers are initially started in the early years,

the game presents the historic period too. The game progression is from 1960 to the present. Well-educated gamers will find this game attractive due to an excellent build up of the air transport, modern physics models and gameplay. ✗✗✗✗✗✗✗✗✗✗✗✗ ✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗ ✗✗✗✗✗✗✗✗✗✗✗✗✗✗✗

Train Sim World® 2: BR Heavy Freight Pack Loco Add-On Features Key:

Multiple Course Settings

- 4 different courses including a new class to enjoy in a new style.
- Ability to play directly in the Title Screen with or without difficulty.
- Save data is saved at the very point when you last cleared the game thus allowing you to pick up where you left off even within different save files.
- Switch from single to local co-op play with two players on the same system is also supported.

Finishing System

- The game allows you to equip characters with various abilities and items. The traditional "Finish" system is used to appraise each character's combat effectiveness at the cost of speed and defense and is used when equipping equipment, modifying equipment and

upgrading armor. The character with the highest score at the end is declared the winner.

Challenging Storyline

- Fate, the Shield of Vanishing has created another battle to keep Valtiel, Tresia and a few others out of the hands of Amon. Legendary heroes will be drawn into a battle the likes of which have never been seen for if this plan is carried out it will lead to the end of the world. The story will continue even if you choose not to clear the main quest.

Special Multiplayer Mode

- Players can collaborate on missions, character creation, no-holds-barred fights in the Duty Map, new weapons and an array of new techniques to aid your duels.

Key Features:

Class System Expansion

- More characters have been added to the Battlefield Rave class. These include:
- Voile, a classmate of Tresia of the Marcher Arc.
- Mariaille, a new, rookie grade 3 officer.
