Zoommy PC/Windows [Updated] 2022

Magnifying the selected area of the screen. Replacement for MS Magnifier. The area of the screen is shown in the lens window with customizable magnification up to 20 times. The lens is controlled as easily as possible: a click on the Zoommy Crack Keygen icon in the tray shows the lens, another click hides it. A right click on the same icon opens a menu with parameters. Each of them can be changed with one more click. Zoommy For Windows 10 Crack is a magnifier tool for the visually impaired. Using Zoommy Full Crack it is possible to adjust contrast, brightness, color mode: normal, inverse, black and white or gray gradations. The size of the lens is also customizable. Its unique mode can slow down the mouse when the specified magnification level is used. This mode is automatically disabled when you hide the magnifier. The lens window shows the current magnification, proportionally magnified mouse pointer and its current coordinates. The pointer looks in a special way that will help to precisely determine the actual position of the mouse pointer and also the color of the pixel the pointer is currently pointing to. The color of the pixel is in the RGB format (red, green and blue) and in the hexadecimal format. Zoommy can run in two modes: the lens follows the mouse pointer or is fixed in a certain position on the screen. It has a simple and comfortable interface. If you want it, Zoommy can be automatically launched at Windows startup With this tool you will be able to see each and every detail. Moreover, unlike similar software, Zoommy's magnifying glass works for both zoom in and zoom out, allowing zooming from -4x to 30x. Thus, if you need to see a distant view of some large image, it will also be of help. With Zoommy, you can quickly measure the size of the selected area in various units, including centimeters, inches, percent, etc. Another feature is that you can copy an image from the lens window to clipboard and save it to a file, i.e. you can make screenshots of zoomed objects. Zoommy also comes in handy when you need to know the color of some pixel. The pixel color is shown in RGB, CMYK, HSV, Lab and in two hexadecimal formats. It can match the color of the pixel with one of the 'Web colors' which is especially convenient in web design. Zoommy is designed to provide users with maximum comfort and flexibility. The software has the unique b7e8fd5c8
