You are Max, a successful businessman living in 2287 Chicago. Everything is going well, until you discover something that changes everything... you start aging at an incredible rate. Scared, you call the best doctors in the world, but their answers are puzzling and disturbing. The doctors tell you that you are suffering from accelerated aging and soon you will die unless you sign up for their bizarre procedure. So, with only a few months left to live, you decide to accept and enroll in the Korg-3 study in exchange for your freedom. Will you finally live the life you've always wanted? Or will you die before you get to live it? Key Features: Ageing Management Max is falling behind in life and can only make progress by making hard choices. Does the prospect of living forever on the edge of death appeal to you? Or is it not enough to just live your life? See how long you can keep your mortality a secret to yourself, by hiding this information from everyone who matters to you, including all of your friends, family, and colleagues. Who you see and whom you talk to plays a large role in the timeline that you have. Underground Healthcare Max's problems get even worse when he realises that he's not the only person who's aging. Max has to be careful, his own doctor will be only too happy to help his friends if he starts dying. With no proper medical facilities available, he will have to find a way to live well in a place where medicine is non-existent. Will your limited skills and knowledge survive the challenges of underground life? Will you play by the rules, or will you break them? Graphical-Interactive Animation We've taken the first steps towards creating a living, breathing world, where there are no boundaries for your imagination. You are in control of how your character ages - you can either enjoy the experience of youth, or choose to become a creature of the shadows. You can experience the intrigues of the underground, rescue your friends, and keep track of your life as it passes into history. Customized Worlds Exploration is just the beginning of every player's journey. Once in the world of Korg-3, you will have to make countless choices that will affect your character's physical state. Are you going to follow a strict regimen, or are you going to play the role of a lawless rogue? Will you rely on your friends, or will you

In this study, we have developed a new kind of catalyst for the decomposition of NO, which consists of a TiO2 film-coated Zn-rich titanium dioxide nanoparticles (ZnTi-TiO2) prepared by atomic layer deposition, or ZnTi-TiO2@T, using organometallic organosilane precursors. TiO2, ZnO and Zn2TiO4 nanoparticles were uniformly coated on the surfaces of TiO2 films on stainless steel substrates
