Fluid Mechanics and Fluid Power Engineering The easiest way to get a free, secure PDF of the entire textbook is to download the PDF from the website: There will be separate PDF files for each chapter. The PDF files for each chapter are in some cases quite large, so some people may have to download and then "clean" them by using Adobe Acrobat's tool: "Optimize PDF File." In this case, the first part of the process is to download the PDF as you normally would and then go to the "Save As" option in the "Save" toolbar. There you can select "PDF" and then uncheck all the boxes except "Optimize PDF File" which should be checked. This will give

---

you an optimized version that is about 5-10% smaller than the first version. If you want to have all the features (an image, links, footnotes, etc.) you can download the PDF using the provided link (where the PDF is automatically listed in the download list). Let us know if that works for you! /\*\*\*\*\*
