

[Download](#)

A release of AutoCAD is often referred to as a version number, such as AutoCAD 2016, AutoCAD LT 2015, AutoCAD 2017, etc. A new version of AutoCAD can be downloaded from Autodesk's website. While initially sold as a desktop application on microcomputers, AutoCAD has since been sold on most major personal computers, with Windows and macOS as the most common platforms. The initial version of AutoCAD was released for the Apple Macintosh in 1984 and Windows in 1985. A port to the Amiga system was released in 1987. AutoCAD was originally offered by Autodesk as a subscription-based app. Subscribers could purchase upgrades and extra features through Autodesk's website or the app's software update mechanism. Although still available as a subscription-based app, Autodesk sells AutoCAD as a perpetual license product as of January 2016. This page lists links to pages describing the history of AutoCAD.

### AutoCAD History

The History of AutoCAD AutoCAD was initially developed for Microsoft's Cambridge Research Lab (CRL). The initial version was developed in 1983 by Charles Simonyi, Charles Simonyi, Jeff Shaffer, and others. The name "AutoCAD" comes from Simonyi's son's name "Automatic CAD", who at that time was a toddler. Simonyi later told a radio program: "I wanted to call it Autodesk, but the Acronym Finder had already taken it, so I went looking for a word that was close to 'Automatic CAD' and came across 'AutoCAD', so I went with that. Of course I had to add the 'CAD' to it later. I found I couldn't trademark the AutoCAD part, but I was able to get the acronym which stuck. And then I had to have the full word 'AutoCAD' added to it later." In 1984, Gary Kildall gave Simonyi and his team the right to sell the first public version of AutoCAD. By 1986, the initial version of AutoCAD had been released as a subscription-based app for microcomputers with internal graphics cards (Intel 8086, 8088, Motorola 6800). The software update mechanism for AutoCAD was first introduced in 1987.

Here is a list of tools that extend the functionality of AutoCAD:

### Awards

AutoCAD has been recognized as a strong business partner for the Microsoft Business Solutions Group (MSBSG). The MSBSG was formed in December 1999 to develop the business platform for the Autodesk products. To date, the Microsoft Business Solutions Group has developed over a hundred new AutoCAD-based applications and enhancements to the AutoCAD platform. Many AutoCAD customers have adopted these AutoCAD applications as a key component in their solutions. The AutoCAD team participated in the design of Microsoft Office 2003, and introduced new features in products such as Microsoft Office Project, Microsoft Office SharePoint Server and Microsoft Office Visio. AutoCAD also received the World Class Partner Award at the Microsoft Office Live event in May 2005 for the collaboration and innovation of AutoCAD with other Microsoft Business Solutions Group products. The Autodesk world was also recognized at the 2003 Information Week product of the year awards as a 'World Class Partner' for the design software category. In 2009, AutoCAD won a STAR award for Workflow and Sys Admin Tools for the productivity boost provided to users by the Workflow Manager. AutoCAD 2010 also won the 2010 Golden Bridge Award as the "Best Application for Architects and Design Professionals." In 2010, Autodesk was recognized by the BizRate customer service team as "Best Overall Automation Product" in their annual global survey of products. In 2011, Autodesk's AutoCAD received the Diamond Award for its outstanding performance in several categories. In 2012, Autodesk AutoCAD received a Silver Circle Award from Gartner for the company's continued success in the Workgroup & Collaboration category. In 2014, Autodesk AutoCAD received the highest rating from PC Magazine for overall quality and features as well as winning a Technology Innovation Award for CAD software. Even if the planet didn't have any life, you

---

would still be able to see it By Tania Branigan, Director, World Network ca3bfb1094

With the Autocad desktop, From the File menu, Select Exit. If the key is not activated, type the key and press Enter On the Activation License Agreement page, click OK Activate Autocad from the Programs and Features dialog box Click OK in the Autocad desktop Use the Autocad Command Line Autocad command-line tool, the command line API is used to activate the key, and it has a structure of the following form: {"value" : "guid-string"} The "guid-string" can be found in the Autocad installation folder: ProgramFiles/Autodesk/CAD/installation folder/acad.exe (i.e. if you installed on "C:\Program Files", the install folder is C:\Program Files\Autodesk\CAD\installation folder) To install the tool, Open your command line window (Start menu > "Start > Run"), and type "acad". Press Enter to open the tool. exportText() functions. \*\* @stable to version 1.5 \* @ingroup TextConverter \*/ class PlainToAnsiConverter extends PlainTextConverter { /\*\* \* @stable to version 1.5 \* @ingroup TextConverter \*/ public function convert( \$text, \$context ) { if ( strpos( \$text, '\x1b'. chr( 27 ). '[' ) === false ) { return \$text; } // Convert to ANSI escape sequence representation. return '\x1

New language table: In AutoCAD Release 2023, you can create custom markup languages and use those custom languages directly within the CAD application. Line Arithmetic: Use the Line Arithmetic option in the Insert tab to perform vector math operations directly on line segments. You can add line segments, subtract them, or merge them into a new line segment. This functionality is available with any line type, and line types that have both line and arc style options (polyline, spline, and ellipse) will perform more calculations and show the arc results. New Dynamic Input tab: You can create a custom input area on the Dynamic Input tab. This tab is located at the bottom of the Ribbon. You can create custom input area on the Dynamic Input tab. This tab is located at the bottom of the Ribbon. All default input symbols are based on the most commonly used symbols for AutoCAD users, including a vertical input symbol, user-defined input symbols, and a custom input symbol (for the new Dynamic Input tab). New user-defined input symbols: There are new user-defined input symbols for Windows style floating-point numbers and vertical grid lines. There are new user-defined input symbols for Windows style floating-point numbers and vertical grid lines. New axis options: There are new options for customizing axes, including an option to allow a set number of axis increments to be customizable. There are new options for customizing axes, including an option to allow a set number of axis increments to be customizable. New common functionality: The Hinting Manager now includes a new Screen Hinting dialog box, which enables you to create screen hints for existing drawings. The Hinting Manager now includes a new Screen Hinting dialog box, which enables you to create screen hints for existing drawings. The Dynamic Input tab has new contextual drop-down lists for calculations and inputs. The Dynamic Input tab has new contextual drop-down lists for calculations and inputs. The Snap Layers in Viewport window now includes a new drop-down menu to allow you to select the viewport layer. The Snap Layers in Viewport window now includes a new drop-down menu to allow you to select the viewport layer. Drawing Performance Editor: Evaluate drawing speed improvements for new features that have been added to the Drawing Performance Editor tool in Release 20

---

**System Requirements:**

Operating system: Windows 10 or later (32/64-bit). Processor: 2.8GHz or faster processor. Memory: 1 GB RAM. Graphics: NVIDIA Geforce 7800 GT or equivalent (latest drivers required) Hard disk space: 100 MB Networks: Broadband Internet connection Anti-aliasing: DirectX 11 or higher, Nvidia or AMD PhysX Running time: 5hrs approx Video card specifications: NVIDIA Geforce GTX 980
