Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. Roblox is free to play, with in-game purchases available through a virtual currency called Robux. As of August 2020, Roblox had over 164 million monthly active users, including more than half of all American children under 16. Description of the Related Art Currently, a microwave signal is simply being transmitted through a coaxial cable, or is divided into a high frequency signal and a low frequency signal in a matching box by using a balun. As the frequency of the high frequency signal becomes high, however, an overall length of the coaxial cable becomes long and it is difficult to maintain the characteristic impedance of the coaxial cable. Moreover, it is difficult to miniaturize the matching box for dividing the high frequency signal. Furthermore, an electromagnetic wave generated by an antenna is divided into high frequency and low frequency components by the balun, thereby decreasing the quality factor of the antenna.Cognitive-behavioral therapy, pharmacotherapy, and combined pharmacotherapy and cognitive-behavioral therapy for adults with autism spectrum disorders.
