Please note that this is a free event, no reason to pack and pay for the cost of fuel and the price of flight ticket. To visit Makedonia from Sweden click <http://www.easyjet.com/easyjet-flight-search?utf8=%E2%9C%93> (in Swedish). Please note that in order to enter the airport you will need a passport. Passport details are not allowed to be shown on the page. Other passengers (pilots or not) will be advised on arrival that you are Makedonian. The airport itself has only two runways which are the only 24h open per day: 1 (left to right in the following pics). In order to arrive to the LGTS airport you have to depart from Stockholm-Arlanda Airport (SAA)The airport code is where you want to depart from: SAA. However, you can inform the air traffic control where you want to depart to. The release includes all of Sweden and Denmark, including several more small airports like Kastrup in Copenhagen, Landvetter airport in Gothenburg, even airports in tiny towns like Krampe in Denmark! The problem is, they are not a-player airports, and the inclusion of these airports causes error messages when the game starts, even when downloading manually. Only really work on newer configs. In earlier beta it gave the error that the airport was not accessible, even though it was. A workaround is to create a new airport template for them, using the old version of the airport, then everything will work fine. I cannot post the images, but someone on AVSIM can, but they need a contact from the local airport. More details soon! This version fixes the errors that appeared when downloading the P3D file from the Cdroms website.The airports include, but not limited to: ESSA - Stockholm ArlandaESGB - Stockholm BrommaESKY - Stockholm BrommaESKA - Goteborg LandvetterESKW - Gothenburg LandvetterESSB - Stockholm BrommaEGL - Olofsfjord, Gothenburg (support for Stockholm Bromma will be added when Swedish trace is updated) 5ec8ef588b
