the free, quick and intuitive solution for websiteQ:  
detect & process different types of non-printable chars  
from textfiles in a loop I'm trying to detect and process  
all non-printable characters in a text file (I know it's  
possible by regex and parsetext functions but I want  
to know how to do it in a loop without a regex).

Example of textfile Lorem ip|dolor sit amet,
