pdf). You enter your serial number exactly as it appears on the CD case or invoice. The man was trying to find the modflow flex 2012.1 visual serial number he had...but couldn't. The serial number had to be displayed in at least ten places in this file: as separate lines that were repeated in all these places. He then started looking for the serial number in the .bin, .nix, and .bashrc files. Again, the serial number was not found, and this worried him. Then he started looking for serial numbers in files that might refer to a particular version of modflow. He also started looking in files that he thought might be distribution-specific.
